

Part I Writing

参考范文：

Today increasing importance is being attached to cultivating college students' team spirit. There is no doubt that teamwork is indispensable for college students in life, study, and even in their future work. Cultivating team spirit has become an important element of quality education for college students. From my perspective, it is of great significance for college students to cultivate a positive sense of teamwork.

The reasons why excellent team spirit plays an indispensable part for college students are listed below. First and foremost, there is no doubt that teamwork spirit can be beneficial to maximization of work efficiency. More specifically, cooperation helps to fully understand and share information for every member in the team so that everyone can reap better performance. As a result, the overall efficiency will be greatly enhanced. In addition, improving team spirit also plays an essential role in boosting the interaction among students and building good interpersonal relationships. In other words, team spirit could bring a friendly and harmonious environment where favorable interpersonal relationships can be formed.

In conclusion, there are many obvious advantages of fostering team spirit for college students. It is reasonable for us to expect a bright and promising future by the continuous enhancement of team spirit among the college students.

C	A	C	D									

Part IV Translation

参考译文：

Located in southwest China, the Qinghai-Tibet Plateau covers an area of 2.3 million square kilometers and is known as the "roof of the world" with an average altitude of more than 4,000 meters. The Qinghai-Tibet Plateau is rich in natural resources and beautiful scenery, with a variety of rare wild animals. The low temperature on the Qinghai-Tibet Plateau has created a large area of mountain glaciers. It is the source of many of Asia's famous rivers and a major source of fresh water for China and Southeast Asia. The Qinghai-Tibet Plateau is vital to the global ecosystem. Glaciers on the Qinghai-Tibet Plateau

are melting at an accelerating rate due to the effects of climate change. China has been making efforts to protect the ecosystem of the Qinghai-Tibet Plateau, and with increasing grassland coverage, many endangered species have been effectively protected.
